

For blurred vision and eye strain

IRIS 40

Class 3 OTC drug

<Eye Drops>

- ◆ In daily life, we overuse our eyes, causing symptoms such as trouble seeing things up close, blurred vision causing difficulty reading texts, and a tendency toward eye strain.
- ◆ IRIS 40 activates the metabolism of the eyes, returns eye function toward its normal state, and is effective against symptoms such as blurred vision and eye strain.

Precautions for Use

Things To Consult On

- 1** The following individuals should consult with their doctor, pharmacist, or a registered seller before using this medicine.
 - (1) Persons who are currently being treated by a doctor.
 - (2) Persons who have had allergic symptoms due to medication in the past.
 - (3) Persons with the following symptoms:
Intense eye pain
 - (4) Persons who have received any of the following diagnoses:
Glaucoma
- 2** If any of the following symptoms appear after you have used this medicine, you may be experiencing side effects. As such, please discontinue use immediately and consult with your doctor, pharmacist or registered seller, bringing a copy of this instruction sheet with you.

Relevant Area	Symptoms

Excipients: L-menthol, Dryobalanops aromatica resin, benzalkonium chloride, chlorobutanol, sodium edetate, polysorbate 80, polyoxyethylene hydrogenated castor oil, tonicity agent, boric acid, citric acid, sodium citrate

Precautions for Storage and Handling

- (1) Ensure the cap is tightened securely and store the medicine in a cool place that is out of direct sunlight.
- (2) Keep out of reach of children.
- (3) Do not replace the medicine into a different container. (This may result in misuse or a change in quality)
- (4) Do not share eye drops with anyone else.
- (5) Do not place eye drops in high-temperature locations, such as on the dashboard of your car. (The container may become deformed or the quality of the solution may deteriorate.)
- (6) If the drug spills and stains your clothes while applying to the eye, immediately wash with water. (The yellow color of this drug is due to the ingredient vitamin B₂.)
- (7) Do not use this product beyond its expiration date.
Use this medicine as soon as possible after opening, even if still within the expiration date. (In order to ensure quality.)
- (8) The ingredients may crystallize on the tip of the container or inside the cap depending on the storage conditions.
If this occurs, wipe the product gently with clean gauze or similar material before using.

Precautions and Correct Technique for Eye Drop Application

Precautions

- Avoid contact between the tip of the container and your eyelids or eyelashes. Eye discharge or microorganisms may contaminate the solution or cause it to become cloudy.

Applying the Product Correctly

- Wash your hands thoroughly and avoid touching your eyes directly with your fingers.
- Look up slightly and pull your lower eyelid down with your fingers. Apply drops onto the inner side of your eyelid.
