

# STOMATITIS PATCH TAISHO A

Class 3 OTC drug  
Stomatitis Products

◆STOMATITIS PATCH TAISHO A is a patch to treat stomatitis and glossitis. It sticks well in the mouth, steadily covers the affected site, while the effect continues for a long time.

## Indication

stomatitis, and glossitis

## Dosage and administration

Adhere 1 piece per dose onto each mucous membrane of lesion once to 4 times daily.

\* Do not use this drug in infants aged under 5 years.

Comply with the prescribed dosage and administration instructions.

The drug does not dissolve. It comes off by itself as time passes. (Do not peel off forcibly.)

This is a patch for the oral mucosa. Do not take it orally.

Use for children  $\geq 5$  years old should be supervised by a parent.

For the use of the drug in children, be careful that they may remove the applied drug with fingers.

The drug may not be properly pasted in wrong usage. Read the instruction for use carefully, and use it properly.

Discard the drug, once coming off, instead of swallowing.
