Class 2 OTC drug
Antipyretic analgesics

NARON m

◆NARON m is an antipyretic analgesic containing acetaminophen for relief of fever and pain such as headache and menstrual pain.
◆It contains glycine to protect the stomach membrane and vitamins B_1 and B_2, which often become depleted during a fever.
◆It can be used by family members that are at least 7 years old.
◆NARON m contains no components that may induce drowsiness.

Indication

◆Relief of fever during chills (feeling cold due to fever) and fever
◆Relief of headache, painful menses (menstrual pain), toothache, pain after tooth extraction, lumbago, pain due to stiff shoulders, muscular pain, joint pain, contusion pain, pain associated with sprain (sprain pain), bone fracture pain, traumatic pain, neuralgia, sore throat (throat pain) and earache

Dosage and administration

Take the following dose with cold or lukewarm water. Avoid taking the drug on an empty stomach whenever possible.
Provide a dosing interval for at least 4 hours.
Adults (15 years or over): 2 tablets per dose, 3 times daily
7 to 14 years: 1 tablet per dose, up to 3 times daily
Under 7 years: Do not take

Precaution

・ Comply with the prescribed dosage and administration instructions.
・ The use of the drug in children should be supervised by a parent.

How to take out the tablets

Press the convex part of the PTP sheet containing the tablet firmly with your fingertips, break the aluminum foil on the back side, and take out the tablets. (If the tablets are inadvertently taken together with the PTP sheet containing them, it will lead to unexpected accidents, such as the sharp edge sticking into the esophageal mucosa)

Ingredient

In 2 tablets
Acetaminophen 300mg
Glycine 300mg
Thiamine nitrate (vitamin B_1) 8mg
Riboflavin (vitamin B_2) 4mg

Excipients

Anhydrous silicic acid, cellulose, magnesium aluminometasilicate, hydroxypropylcellulose, sodium starch glycolate, magnesium stearate

Precaution

・ No need to worry if you have yellow urine after taking the drug because it is caused by the vitamin B_2 contained in the drug.
・ Red dots may appear on the tablets due to the vitamin B_2, which is contained in the drug, but this will not alter the effect.
