

# MENFULA A

Class 3 OTC drug

Pain relief/antipruritic/astringent/anti-inflammatory (including cataplasm)

Menfula A is a plaster that contains vitamin E and thermosensitive component (nonanoic acid vanillylamide) that improves blood circulation, methyl salicylate with anti-inflammatory/analgesic effect, and relieves stiff shoulders and lower back pain.

## Indication

Muscular fatigue  
joint pain, lumbago, muscular pain, pain due to stiff shoulders, contusion pain, bone fracture pain, pain associated with sprain (sprain pain), frostbite,

## Dosage and administration

Peel the liner (plastic film), and adhere the drug onto the lesion once to twice daily.  
Comply with the prescribed dosage and administration instructions.  
When allowing children to use the medicine, a guardian must be present to watch and tell such them how to use it.  
If you sweat, or the affected site is wet, wipe well before using the drug.  
Do not warm the skin area to which the drug is applied with kotatsu or electric blanket.  
If your skin is very sensitive, do not apply the drug to the same site continuously.  
If you have sensitive skin and are susceptible to rash, put a small piece of the drug on the inner arm for at least half a day before use, and confirm that no rash/redness, itching, and eruption occurred.  
Stop using the drug if you experience strong itching or pain when using the drug.  
Do not take a bath after the drug is applied or immediately after removing the drug. (The site may become sore. Remove the drug at least 1 hour before taking a bath. Wait at least 30 minutes after taking a bath before using the drug.)
