 - (1) Persons receiving treatment from a doctor.
 - (2) Persons with a history of allergic reactions caused by medicines, etc.

- 2** If any of the following symptoms appear after you have used this medicine, you may be experiencing side effects. As such, please discontinue use immediately and consult with your doctor, pharmacist or registered seller with a copy of this instruction sheet

Relevant Area	Symptoms
Skin	Rashes/redness, itching, swelling
Other	Irritation

- 3** If symptoms do not improve after approximately 10 days of using this medicine, discontinue use and consult with your doctor, pharmacist, or registered seller with a copy of this instruction sheet

Efficacy

Relief and disinfection for itching, swelling, pain, and bleeding of wart hemorrhoids and anal fistulas (bleeding hemorrhoids)

Usage/Dosage

Take an appropriate amount and apply it to the anal region one to three times a day.

How to Open up a Hole in the Tube

Reverse the cap and press the protrusion firmly against the tip of the tube's raised neck.

- ★ Bathe or clean the affected area with warm water before use. This medicine is more effective if it is used in the morning after a bowel movement or at night before bed.

[Note]

- (1) Strictly follow the prescribed usage and dosage.
- (2) If this medicine is being used by a child, ensure it is used under the guidance and supervision of a parent or guardian.
- (3) This medicine should only be used on the anal region.
- (4) The way this medicine feels to use will vary from person to person. Those with sensitive skin or membranes may feel a strong cooling sensation. As such, start by trying only a small amount.
